Education

Bachelor of Technology– Computer Science Engineering, 7.66 GPA **May 2025**

- ✓ School of Engineering & Applied Sciences, Bennett University, Greater Noida, India

Class XII(ISC), 81% **May2021**

- ✓ Scottish High International School, Sector-57, Gurugram, India

Class X(ICSE), 85% **May2019**

- ✓ Scottish High International School, Sector-57, Gurugram, India

WorkExperience

Djubo | Associate Engineer (AngularJS, Python, Django, JavaScript) **June 2025-February 2026**

- ✓ Worked on DJubo(djubo.in), a hospitality SaaS HMS used by 2500+ hotels across 20+ countries, handling hotel operations and booking workflows
- ✓ Developed an end-to-end Attendance Tracking System with Angular on the frontend and Python/Django on the backend, enabling real-time employee monitoring and reliable data processing. Integrated interactive data visualizations with Chart.js to enhance administrative insights.
- ✓ Enhanced multiple Djubo product features, including improving internal team tables, modifying backend templates, and implementing Excel column automation using Python to optimize operational workflows.
- ✓ Added key product functionalities such as a time cut-off feature in the booking system, improving accuracy and control in reservation management.

Vdoit Technologies Python Developer (AWSLambda, Python) **January 2025-April 2025**

- ✓ Developed backend modules supporting booking and user-management workflows similar to hospitality systems, ensuring scalable processing and reliability.
- ✓ Built and deployed AWS Lambda services to automate system actions, notifications, and operational triggers.
- ✓ Created REST APIs enabling smooth communication between system dashboards and user interfaces.
- ✓ Implemented AWSSES email templates for automated correspondence and performed CRUD operations on Amazon DynamoDB to manage data efficiently.

Genpact | Consultant (MS Fabric) **June 2024-December 2024**

- ✓ Developed data pipelines for seamless migration from MS Azure to MS Fabric.
- ✓ Executed and optimized SQL queries and updated DDLS in the metadata.
- ✓ Created comprehensive reports to assist HR in hiring and resource management

FnMathLogic | Data Science Intern (Bagging and boosting Techniques) **July 2023**

- ✓ Successfully completed the "Home Credit Default Risk" project, dedicated to facilitating loan access for individuals lacking credit history through authorized institutions.
- ✓ Utilized Extreme Gradient Boosting and Random Forest classifiers in project implementation.
- ✓ Assessed model effectiveness through performance metrics including recall, F1-score, and precision.

Projects[https://github.com/shreyansjain0206]

- **E-Commerce Application (2025) (Node.js, Express.js, MongoDB):**
  - ✓ Engineered a robust backend API for an e-commerce platform leveraging Node.js, Express.js, and MongoDB with Mongoose for schema-based data modeling.
  - ✓ Implemented secure user authentication using JWT and bcrypt, enabling encrypted credential management and session handling.
  - ✓ Designed and modularized RESTful endpoints for cart operations and order processing, ensuring scalability and maintainability of the codebase.
- **Todo List App (2025) (Node.js, Express.js, MongoDB):**
  - ✓ Developed a full-stack Todo List application using Node.js, Express.js, MongoDB, and EJS to perform CRUD operations with task completion tracking.
  - ✓ Implemented dynamic views with EJS templating and managed data persistence using MongoDB (local/Atlas).
  - ✓ Utilized modern ES6 modules and integrated middleware like body-parser for efficient form data handling.

- **SMS Classifier (2023) (NLP):**
  - ✓ Created a text classification model utilizing Python, with the aim of applying data science methodologies to categorize SMS messages into spam or non-spam classifications.
  - ✓ Utilized Count Vectorizer and TF-IDF techniques for text extraction, employing Gaussian Naive Bayes, Multinomial Naive Bayes, and Bernoulli Naive Bayes algorithms across both methods.
- **Adaptive Traffic Control Signal System(2023) (Computer Vision):**
  - ✓ Spearheaded a project to implement a novel traffic signal timer system that adjusts based on vehicle count and density, effectively reducing traffic congestion on roadways.
  - ✓ Employed OpenCV, Matplotlib, NumPy, and the YOLOv3 architecture, along with mathematical formulas, to develop the solution.
- **Sea Surface Temperature using LSTM (2023) (Machine Learning):**
  - ✓ Conducted research on sea surface temperature forecasting using LSTM models, and compared their performance with traditional prediction, classification, and time series models.
  - ✓ Evaluated model performance using metrics including RMSE, MSE, R-squared, MAPE, MAE, precision, recall, and F1-score, providing insights into forecasting accuracy and suitability for different applications.

Research Papers/Publications(https://ieeexplore.ieee.org/document/11134192)

- ✓ Nitin Arvind Shelke; Shubham; Shalv Srivastava; Shreyans Jain," Adaptive Traffic Signal Control System for Vehicle Detection and Traffic Density Estimation," 4th International Conference (IEEE)", 2024
  - Published in IEEE Xplore. Proposed an adaptive traffic-signal timer using vehicle detection and traffic-density estimation (YOLO/Computer Vision based) to optimize signal timing and reduce congestion

Certifications

- ✓ Machine Learning with Python (IBM) 2023
- ✓ Specialized Models: Time Series and Survival Analysis (IBM) 2023
- ✓ Predictive Modeling and Analytics (University of Colorado Boulder) 2023

Achievements

- ✓ Shortlisted and completed a 2-month training program at Remote State 2024
- ✓ Advanced to the second round of the Naukri Young Turks competition, showcasing problem-solving and analytical skills. 2024

Extra- Curricular Activities

- ✓ Attended an Ai/ML event called Cypher Organized by Analytics India Magazine. 2023

Key Skills(https://leetcode.com/shreyans_0206/)

- **Technologies**: Azure |MS Fabric|AWS Lambda|AWS DynamoDB |AWS S3 |AWS SES|AWS API Gateway |Postman
- **Languages**: C++ |Python |Node.js
- **Databases**: MonogDB|MySQL
- **Technical Skills**: Data Structures and Algorithms|Data Science| Machine Learning| DBMS|TimeSeries
- **Frameworks and Software Packages**: Numpy | Pandas| Sklearn | Matplotlib |Express.js|Django|Angular
- **Soft Skills:** Teamwork |Problem Solving| multi-Tasker.
